

CLAIM:

1 1. A male foreskin replacement for sensation preservation
2 comprising:

3 a multi-layer synthetic covering for the penis having:

4 a) a first layer in contact with the penis when
5 worn, of a porosity to allow a urine stream to flow
6 therethrough;

7 b) a second layer overlying said first layer to
8 wick fluid away therefrom;

9 c) a third layer overlying said second layer of
10 high fluid absorbency; and

11 d) a fourth layer overlying said third layer
12 porous to air and substantially impervious to fluid flow;

13 an elasticized material at one end of said fourth
14 layer to hold said multi-layer synthetic covering in place when
15 worn; and

16 means on said fourth layer actuatable to open a closure
17 path communicating through said first, second, third and fourth
18 layers.

1 2. The male foreskin replacement of Claim 1 wherein said
2 first layer is composed of a gauze-like material.

1 3. The male foreskin replacement of Claim 1 wherein said
2 first layer is composed of a sterile gauze-like material.

1 4. The male foreskin replacement of Claim 1 wherein said
2 first layer is composed of polypropylene.

1 5. The male foreskin replacement of Claim 1 wherein said
2 third layer is composed of a super absorbent polymer.

1 6. The male foreskin replacement of Claim 1 wherein said
2 third layer is composed of a super absorbent polymer capable of
3 holding up to eighty times its weight in water.

1 7. The male foreskin replacement of Claim 1 wherein said
2 fourth layer is composed of one of rubber, acetate, lambskin and
3 polypropylene.

1 8. The male foreskin replacement of Claim 1 wherein said
2 first layer is composed of polypropylene, wherein said third
3 layer is composed of a super absorbent polymer capable of
4 holding up to eighty times its weight in water, and wherein said
5 fourth layer is composed of one of rubber, acetate, lambskin and
6 polypropylene.
